

About Quality Management Suite for Acumatica

eWorkplace Apps is extending Acumatica to meet quality goals of the manufacturers and distributors. Quality Management Suite for Acumatica lets manufacturers and distributors perform the inspection and quality tests required at various stages leading to enhanced quality while meeting required policy standards. Conduct quality testing at the time of incoming goods, in production (in-process, at completion), shipping, ad-hoc, return merchandise authorization (RMA) and kit assembly which enables users to deliver quality products with greater consistency. Also, beyond testing, allows to perform and track non-conformance, and corrective and preventive actions.

Key Features

- Testing and recall
- Inspection and checklist
- Sampling
- AQL/RQL
- Non-Conformance (NC), corrective and preventive action (CAPA), root cause analysis
- Forward and backward lot traceability and recall
- Certificate of Analysis (CoA)
- Calibration
