

JDE UtilityTool Kit

Efficiently Manage Your Upgrades and Multiple Instances

COMPARISON

Questions to Consider:

How often do you need to compare UDC's, Menus, Processing Options, Data Selection and Data Dictionary Items between environments and systems?

Would you like to be able to compare UDC's looking for missing values and different descriptions.?

Would you like to be able easily generate a detail side by side comparison Processing Options?

Would you like to easily compare menus from the older system to the current system?

Are you having difficulty distinguishing data dictionary items between your vanilla and current system?

Do you want to compare your database table record counts in under a minute?

Do you want an easy-to-use exportable tool that users can open in Excel for further analysis?

COMPARISON TOOL KIT

Are you spending significant time comparing out of synch UDC's, Menus, Processing Options, Data Selections and Data Dictionary Items between environments?

C&A Technology is providing clients with a portfolio of **six (6)** JDE environment **"Comparison Utility Tools"** to assist JDE customers to more efficiently manage their JDE upgrades and multiple instances with side by side comparisons of UDC's, Menus, Processing Options, Data Selections, Database record counts, table layout and Data Dictionary Items. In each case, an excel file can be generated for an examination of the results

1. USER DEFINED CODES

- Comparison of User Defined Code values between environments and systems
- Standalone tool that will connect with any JDE environment supporting the XMLList model of interoperability
- Compare based on the system code, product code and key value looking for missing values and different descriptions

2. PROCESSING OPTIONS

- Detailed side by side comparison of installed versions of Program processing option settings to the "To Be" structure (upgrade version)
- Export the document to provide the consultant a working document for annotations and creating Project Setup and User Documentation
- Ability to inspect and compare the actual processing values

COMPARISON

JDE UTILITY TOOLKIT - COMPARISON TOOL KIT (continued)

3. MENUS

- Compare menus from older versions to newer versions to accommodate changes the menu structure for new feature functionality
- Provides more details than standard JDE menu reports provided
- These are reports that CAT have used continuously in the field

4. DATA DICTIONARY ITEMS

- Provides side by side comparison of Data Dictionary elements that are either changed, missing or extra
- Export the document to provide a working document for annotations and creating Project Setup and User Documentation

5. UBE DATA SELECTION

- Provides side by side comparison of installed versions of UBE Data Selections
- Export the document to Excel to provide a working document for annotations and creating Project Setup and User Documentation
- Ability to inspect and compare the actual data selection settings

6. DATA ANALYZER

- Compare full data source table record counts in under a minute!
- Compare full data source table layouts in a side by side fashion!
- Generate a side by side comparison of record counts and data amount summations by columns
